DETAILED ACTION

The applicants' response, filed 09/08/2009 under 37 CFR 1.116 in reply to the final rejection has been considered. Claims 1-9 and 11-18 are pending. In view of applicants' response, the 112 second paragraph rejection, 102 rejection and 103 rejection made in the previous office action have been obviated. Upon further consideration the Finality of the previous office action is withdrawn to name the following new grounds of rejections.

A telephone call was made to seek authorization to amend claims 8 and 11 by Examiner's amendment and obviate this office action. However, counselor Howard Lee was not available and no response was received for the telephone message left.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Claim 8 is an improper claim as it depends indirectly on method of use claim for the definition of X, Y, Z. Claim 8 which is dependent on compound claim 7 refers to Formula I for definition of X, Y, Z and other variables. But claim 7 does not recite formula I. Claim 1 recites Formula I and hence, claim 8 appears to depend on claim 1 which is improper. Note a process claim cannot depend on a method of use claim.

2. Compound claim 11 is an improper dependent claim as it depends on a method of use claim 1. Note a compound claim cannot depend on a method of use claim.

Allowable Subject Matter

Claims 1-7, 9 and 12-18 are allowed. Claims 8 and 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
